

Intesa Sanpaolo and DG TREN of the European Commission request your participation in the forthcoming EU Sustainable Energy Week 2008

The **EU Sustainable Energy Week** (EUSEW) (<http://www.eusew.eu>) is *the* event for EU policy on sustainable energy, dealing with major issues on energy and the fight against climate change. Following last year's acclaimed inaugural week of activities, **European Sustainable Energy Week 2008, January 28–1 February, 2008** is again bringing together thousands of private and public decision makers – both in Brussels and across Europe. These events are unique opportunities to keep in touch with latest policy and market developments, as well as best practice on energy efficiency, renewable energies and clean transport.

Intesa Sanpaolo will contribute to this promotional action through the conference "*Sustainable energy from the sun: projects and solutions for photovoltaic installation*" that will take place in Rome on 30th January 2008. This conference intends to explain, especially to Small and Medium Enterprises, the opportunities provided by the Italian regulations and the financial and technical solutions for enterprises that wish to invest in photovoltaic installation to meet energy needs.

In 2007, more than 40 major worldwide organisations showed their commitment to the initiative, organising more than thirty events, in Brussels, Murcia, Grenoble, Namur and Wels. This year many other events will be organised in Europe and we hope that you will get involved. Together we can make a difference and change the landscape of energy.

An initiative of DG Transport and Energy of the European Commission, the events within EUSEW 2008 are also supported by the Slovenian Presidency of the European Council, the Committee of the Regions, the Economic and Social Committee, Austrian and Italian Ministries of Environment, and most relevant actors in the field including Intesa Sanpaolo

Take a week to change your future!

EUSEW 2008 (<http://www.eusew.eu>)

28 January – 1 February 2008
