INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF AMERICAN BANK OF ALBANIA SH.A

We have audited the accompanying financial statements of the American Bank of Albania Sh.a. ("the Bank"), which comprise the balance sheet as at 31 December 2007 and the income statement, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes. The financial statements of the Bank as of 31 December 2006 and for the year then ended had been audited by other auditors whose report dated 13 March 2007 expressed an unqualified opinion on those financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Article 38 of the Banking Law of the Republic of Albania (Law No.8365, dated 2 July 1998). This responsibility includes: designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or errors; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable to the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtaining audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate for the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating of the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our audit opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of the Bank as of 31 December 2007, and of the results of its operations and its cash flows for the year then ended in accordance with the Banking Law of the Republic of Albania.

1. Reporting Entity

The American Bank of Albania, (the "Bank"), was incorporated on May 1998 with its principal location in Tirana. The bank was authorized to undertake banking activity in Albania according to the law no, 8365, "For the Banking system in Albania" dated July 2, 1998 and substituted by the law no 9662 "On the Banks in Albania" enforced on June 2007. The Bank started operations on September 24, 1998. By the end of 2006 the Bank had opened branches in Durres, Vlora, Elbasan, Fier, Gjirokastra, Korca, Lushnja and several agencies in Tirana and Durres. It was also presented abroad, with two branches opened in Greece, in Athens and Thessalonica. And expanding the network, during 2007, the bank opened two other branches in Greece, Peristeri and Piraeus, as well as, four new agencies in Tirana achieving therefore a number of 15 agencies. With the first installations of ATMs and POSs during 2004, as of 31 December 2007 the Bank achieved to offer cash facilities through 55 ATMs and 656 Point-of-sales (POS-es). The Consolidated financial statements of the Bank as of 31 December 2007 and for period then ended comprise the Bank and its subsidiaries in Greece (i.e. the Greek branches), which operates as separate legal entity.

The Bank had 400 employees as of 31 December 2007 (2006: 367), including 5 expatriate senior managers in Albania and 29 employees in Greece.

On 20-21 December 2006, the Albanian-American Enterprise Fund (hereinafter the "AAEF") in its capacity of sole Bank shareholder signed a Share Purchase Agreement (hereinafter the "Purchase Agreement") with Sanpaolo Imi S.p.a. (the "Purchaser"), an entity incorporated under the laws of Republic of Italy intending to sell 12,000,000 shares of the Bank with a nominal value of Usd 2,2266 equal to an equity portion of 80% of the Bank entire issued capital, for a price of Usd 125,520 thousand (the "Purchase Price"). As of 1st of January 2007 SANPAOLO IMI S.p.a. and Banca Intesa S.p.a. created Intesa Sanpaolo S.p.a through the merger of these two banks. On 29 June 2007, the Closing Date as defined in the Purchase Agreement, after the fulfillment of all conditions, the representatives of AAEF and Intesa Sanpaolo S.p.a signed the transfer of shares.

2. Significant Accounting Policies

A summary of the most significant accounting policies adopted in the preparation of these financial statements is presented below:

(a) Basis of Preparation

The consolidated financial statements have been prepared in accordance with the Banking Law of the Republic of Albania Law 9662 "For the Banks" in the Republic of Albania" (entered into force on 1 June 2007)

The consolidated financial statements have been prepared on a historical cost basis except for available-for-sale financial assets that are measured at lower of cost or their fair value and its accounting policies applied are the same as those applied from Bank as for the year ended 31 December 2006.

(b) Functional and presentation currency

These consolidated financial statements are presented in Lek, which is the Bank's functional currency. Except as indicated, financial information presented in Lek has been rounded to the nearest thousand.

Notes to the consolidated financial statements for the period ended 31 December 2007

(amounts in '000 Lek, unless otherwise stated)

2. Significant Accounting Policies (continued)

(c) As allowed by local legislation, until August 2007, when the share capital of the bank was converted into Albanian Lek, at an equivalent of Lek 3,001,851 thousand, capital was recorded in US Dollars according to the historical exchange rates at the respective transaction dates, and was presented for statutory purposes in the Lek equivalent of the original US Dollar balances. In accordance with local regulations, the difference between the Lek value of capital at the historic rate of exchange and the rate of exchange of the balance sheet date was recorded as a translation reserve in equity.

Basis of Consolidation

(i) Subsidiaries

Subsidiaries are entities (branches) controlled by the Bank. Control exists when the Bank has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

(ii) Transactions eliminated on consolidation

Intra-group balances, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains are eliminated in preparing the consolidated financial statements. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

(d) Foreign currency

(i) Foreign currency translations

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rate ruling at year-end. Foreign exchange differences arising on translation are recognised in the statement of income and expenditures in "Profit from foreign exchange transactions". Non-monetary assets and liabilities denominated in foreign currencies, which are stated at historic cost, are translated at the foreign exchange rate ruling at the date of the transaction. Furthermore allowance for loan losses for loans and provision for guarantees to customers all denominated in foreign currency are translated at the foreign exchange rate ruling at the reporting date.

(ii) Foreign operations

The assets and liabilities of foreign operations are translated to functional currency (i.e. Eur) of the foreign operator at exchange rates quoted in that jurisdiction (i.e. Greece) at the reporting date. The income and expenses of foreign operations are translated to Eur at exchange rates quoted in that jurisdiction (i.e. Greece) at the dates of the transactions.

Notes to the consolidated financial statements for the period ended 31 December 2007

(amounts in '000 Lek, unless otherwise stated)

2. Significant Accounting Policies (continued)

(d) Foreign currency (continued)

The foreign operations are translated into the group presentation currency as follows:

- assets and liabilities are translated at the Bank's exchange rate at the balances sheet date;
- items of revenue and expenses are translated at the Bank's exchange rate at the balances sheet date;
- any gains or losses resulting from the intra-group balances elimination are recognized in the balance sheet items, other than equity

APPLICABLE RATE OF EXCHANGES

The applicable exchange rates for the main foreign currencies as at 31 December 2007 and 31 December 2006 are as follows:

| | 2007 | 2006 | |
|-----|--------|--------|--|
| USD | 82.89 | 94.14 | |
| EUR | 121.78 | 123.85 | |

(e) Cash and cash equivalents

Cash and cash equivalents comprise cash balances on hand, unrestricted cash deposited at the Central Bank and unrestricted placements and balances with banks including inter-bank placements and short-term highly liquid investments with maturities of three months or less when purchased. (refer to note 23)

(f) Investments

All investment securities are initially measured at cost, being the fair value of the consideration given, plus incremental direct transactions costs associated with the investment. Subsequently to its initial recognition any securities held by the Bank are categorized into portfolios in accordance with the Bank's intent on the acquisition of the securities and pursuant to the Bank's securities investment strategy. These are classified as follows:

- Held-to-maturity; and
- Available-for-sale.

At the end of 2007, the Bank has done an adjustment by transferring its perpetual securities from HTM to AFS portfolio. In line with the correction principle of Bank Accounting Manual, the impact has corrected the profit of financial year 2007 (and not the previous financial years).

(i) Held-to-maturity

Investments held-to-maturity are financial assets with fixed or determinable payments and fixed maturities that the Bank has the positive intent and ability to hold to maturity.

Notes to the consolidated financial statements for the period ended 31 December 2007

(amounts in '000 Lek, unless otherwise stated)

2. Significant Accounting Policies (continued)

(f) Investments (continued)

Held-to-maturity investments are recognized on a trade-date basis and are initially measured at cost. At subsequent reporting dates they are measured at amortized cost, less any impairment loss recognized to reflect if there is a strong likelihood of the bank not holding these securities until maturity because of new circumstances or if there is a risk of default by the issuer of the securities. The annual amortization of any discount or premium on the acquisition of held-to-maturity securities is aggregated with other investment income receivable over the term of the instrument so that the revenue recognized in each period represents a constant yield on the investment.

(ii) Available-for-sale

After initial recognition, investments, which are classified as "available-for-sale", are re-measured at fair value if fair value is lower than their cost. On each accounting statement date, provisions are made, by homogeneous group of securities of the same type, against the unrealized capital losses resulting from the difference between the book value, adjusted if necessary for amortization and write-backs of differences and the market price of the securities. The losses arising from changes in the fair value of such available-for-sale investments are included in net profit or loss for the period in which they arise. Unrealized capital gains are not recognized in the accounts.

Estimation of fair values

The fair value of investments traded in organized financial markets, is determined by reference to stock exchange quoted market bid prices on the balance sheet date. Investments, which have no quoted market prices, a reasonable estimation of the fair value is determined by reference to the current market value of another instrument which is substantially the same, or is based on the expected cash flows, or the underlying net asset base of the investment (also refer to notes 4 and 5).

(g) Commercial loans

Commercial loans and advances to customers are stated at cost less allowances for potential loan losses. Loans are written-off based on a management decision when the customer has been in serious default and arrears. The loans are recognized upon disbursement and repayments are recognized when the cash is received. Interest is accounted for on an accrual basis.

Allowance for Loan Losses

Provisions are created pursuant to approval No. 52 of the Bank of Albania "On Credit Risk Management" (the "Credit Regulation") signed by the Supervisory Board on 14 July 2004. The regulation requires the Bank to classify exposures into five risk categories. For each risk category, the following minimum rates of provisions are applied:

| Type of loans | Days in arrears | Provision rate |
|-----------------|-----------------|----------------|
| Standard | 0-30 days | 1% |
| Special Mention | 31-90 days | 5% |

Notes to the consolidated financial statements for the period ended 31 December 2007

(amounts in '000 Lek, unless otherwise stated)

| Substandard | 91-180 days | 20% |
|-------------|---------------|------|
| Doubtful | 181-365 days | 50% |
| Lost | Over 365 days | 100% |

2. Significant Accounting Policies (continued)

The Management performs the classification based on the analysis in accordance with the priority and complementary characteristics, which are as follows:

- a) financial situation of the borrower:
- b) financial situation of the guarantor;
- c) quality of collateral pledged;
- d) days in arrear;
- e) overdraft movements in the borrower's current account;
- f) rescheduling due to financial situation deterioration.

(h) Repurchase agreements and reverse repurchase agreements

Securities purchased under agreements to resell (reverse repurchase agreements) and securities sold under agreements to repurchase (repurchase agreements) are generally treated as collaterized financing transactions and are carried at the amounts of cash advanced or received, plus accrued interest.

Securities received under reverse repurchase agreements and securities delivered under repurchase agreements are not recognized at the balance sheet or derecognized from the balance sheet, unless control of the contractual rights that comprise these securities is relinquished.

Interest earned on reverse repurchase agreements and interest incurred on repurchase agreements is recognized as interest income or interest expense, over the life of each agreement. All the repurchase agreements and reverse agreements have occurred only with the Central Bank of Albania.

(i) Property and equipment

(i) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost is directly attributable for bringing the asset into working condition for its intended use. When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

(ii)Subsequent costs

The cost of replacing part of an item of property and equipment is recognized in the carrying amount of the item if it is probable that future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The cost of the day-to-day servicing property and equipment are recognized in the income statement as incurred.

(iii) Depreciation

Depreciation is recognized, in the income statement on a declining basis over the estimated useful lives of the assets for office equipments, computer and related equipments and on a straight-line basis for building being also in accordance with the useful life estimation in force from fiscal legislation. No depreciation is provided on fine art works.

Notes to the consolidated financial statements for the period ended 31 December 2007

(amounts in '000 Lek, unless otherwise stated)

2. Significant Accounting Policies (continued)

The estimated useful lives for the current and comparative periods are as follows:

| Building | 20 years |
|------------------------------|----------|
| • PC & other Related | 4 years |
| • Furniture & Equipments | 5 years |
| • ATMs | 8 years |
| • POS-es | 7 years |

(j) Intangible assets

(i) Software

Software acquired by the Group is stated at cost less accumulated amortization and accumulated impairment losses (if any). Subsequent expenditure on software assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates, otherwise it is expensed as incurred. Amortization is recognized in income statement on a declining basis over an estimated useful life of 4 years (2006: 4 years) from the date it is available for use.

(ii) Start-up

Start-up expenses relate to pre-operating expenses incurred when new branches are opened and are stated at cost less accumulated amortization and accumulated impairment losses (if any). Amortization for the start-up costs and licenses and trademarks, is recognized in income statement on a straight-line basis over an estimated useful life of 7 years (2006: 10 to 7 years), by applying tax driven amortization rates. Management believes that the tax regulations provide a more relevant and clear guidance for the assessment of useful life of assets in the transition period to the adoption of IFRS in Albania.

(k) Deposits and subordinated debts

Deposits and subordinated debts are the Bank's resources of debt funding. Deposits and subordinated liabilities are measured at their amortized cost.

(l) Employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

(m) Interest income and expense

Interest is calculated in conformity with the Albanian legislation or other relevant agreement between the Bank and its borrowers. Interest income and interest expense are accounted for on accrual basis.

(n) Fees and commissions

Commissions on letters of credit, letters of guarantee and money transfer transactions are recognized as income when the corresponding service is provided. Fee and commission expenses are related mainly to transaction and service fees, which are expensed as the services are received.

(o) Lease payments made

Notes to the consolidated financial statements for the period ended 31 December 2007

(amounts in '000 Lek, unless otherwise stated)

Payments made under operating leases are recognized in income statement on a straight-line basis over the term of lease. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease.

2. Significant Accounting Policies (continued)

(p) Taxation

The Bank determines taxation at the end of the year or at an interim date in accordance with the Albanian tax legislation. Taxable income is calculated by adjusting the statutory profit before taxes for certain income and expenditure items as required under Albanian Law (refer also to note 22). No provision is made for deferred taxes.

(r) Off-balance sheet transactions

Forward foreign exchange contracts are treated as off-balance sheet transactions and do not give rise to an entry in the balance sheet until they are settled by the payment or receipt of the currencies to be exchanged. Forward foreign exchange contract gains and losses are accounted for at the time of settlement.

(s) Comparatives

When considered necessary, comparative figures have been adjusted in order to be in alignment with changes in presentation of the current year. The accrued interests are reclassified into the respective item of the balance sheet.

(t) Use of Estimates

The preparation of financial statements in conformity with Bank of Albania Regulations requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Actual results could differ from those estimates.

| Remuneration of Key Managers | 110,490 | 132,276 |

27. Risk management

Interest rate risk

The Asset and Liability Management Committee of the Bank monitor interest rate risk. Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates and the risk that the maturities of interest bearing assets differ from the maturities of the interest bearing liabilities used to fund those assets. The period of time for which the rate of interest is fixed on a financial instrument, therefore indicates to what extent it is exposed to interest rate risk.

The assets and liabilities are re-priced at the discretion of the Bank and carry market interest rates. The Bank maintains a portfolio of interest bearing financial assets and liabilities such that the generated net interest income is significantly in excess of operating requirements, which minimizes the potential adverse effects of interest rate fluctuations. Interest rates applicable to financial assets and liabilities are disclosed in each relevant note to the financial statements.

Credit Risk

In the normal course of its business, the Bank is exposed to credit risk on its loans to customers, on its funds with other financial institutions and due to other off-balance sheet items. The Bank manages its exposure to credit risk on a regular basis by closely monitoring credit limits, its loan portfolio and concentration of exposure.
