  - Pre-tax income at €2,605m (+33.4% vs 1H10)

- High capital ratios further strengthened (1H11 Core Tier 1 ratio at 10.2% after accrued dividend<sup>(2)</sup>) and confirmed even in an adverse scenario by EBA stress test (2012 Core Tier 1 ratio at 8.9% in the adverse scenario)
- Our focus on solidity and liquidity ensures medium-term sustainable profitability even if it negatively affects short-term profitability (e.g. focus on retail funding vs interbank, low leverage and our own bond placements instead of placement of thirdparty bonds)

<sup>(2) €663</sup>m assuming half the amount that would result from the distribution of the same dividend per share paid in 2011 for 2010 to the number of shares outstanding after the capital increase

# Strong funding capability: 100% of 2011 medium/long-term wholesale maturities and 95% of 2011 total medium/long-term maturities already covered as at 29 September

- As at 29 September ~€38bn medium/long-term placements (95% of 2011 maturities) already carried out, of which €15.3bn is wholesale (more than the total of wholesale 2011 maturities)
- The retail branch network is a stable and reliable source of funding: 73% of Direct Customer Deposits come from retail business
- We could even do without the wholesale market for the rest of the year and for 2012, even though this is not our intention

<sup>(2)</sup> Excluding €24bn financial liabilities from insurance business Figures may not add up exactly due to rounding differences

- ~€80bn liquid assets<sup>(2)</sup> as at 31.07.11 in line with 30.06.11

#### High capital ratios: Core Tier 1 ratio up to 10.2%

- More than 200bps increase in 30.06.11 Core Tier 1 ratio vs 31.03.11, of which ~150bps due to the capital increase and ~30bps due to RWA optimisation and the floor reduction from 90% to 85%

### Methodological note (1/3)

- For comparison purposes, 2010 P&L, 2010 Balance Sheet and 1Q11 results have been restated to take into account the sale of the 96 branches to Crédit Agricole
- With reference to the divisional figures, 2010 data has been restated to take into account
  - the attribution of Intesa Sanpaolo Private Bank Suisse results to the Banca dei Territori division, previously attributed to the Corporate and Investment Banking division
- The amendment to IAS 39 adopted by the European Union permitted the reclassification of Financial assets held for trading and/or available for sale into other categories. Following a clear change in the Company's intention taken as a result of unusual events, Intesa Sanpaolo reclassified €2,895m Financial assets held for trading into Loans & Receivables, €98m Financial assets held for trading into Financial assets available for sale and €6,048m Financial assets available for sale into Loans & Receivables. This reclassification reflected management intent to hold for the foreseeable future those assets for which the current and expected future market conditions no longer permit active management. Without this reclassification the 1H11 income statement would have included €23m<sup>(1)</sup> as positive impact from fair value measurement (of which €28m of negative valuations in 2Q11), while the Shareholders' equity would have included €1,048m<sup>(1)</sup> as negative direct impact as at 30.06.11 (of which €110m<sup>(1)</sup> of negative impact in 2Q11)

### Methodological note (2/3)

■ Fair value sensitivity of the structured credit products book: -€8m<sup>(4)</sup> for +25bps of credit spreads

<sup>(4) -€19</sup>m considering securities reclassified to Loans and securities classified under Loans from inception

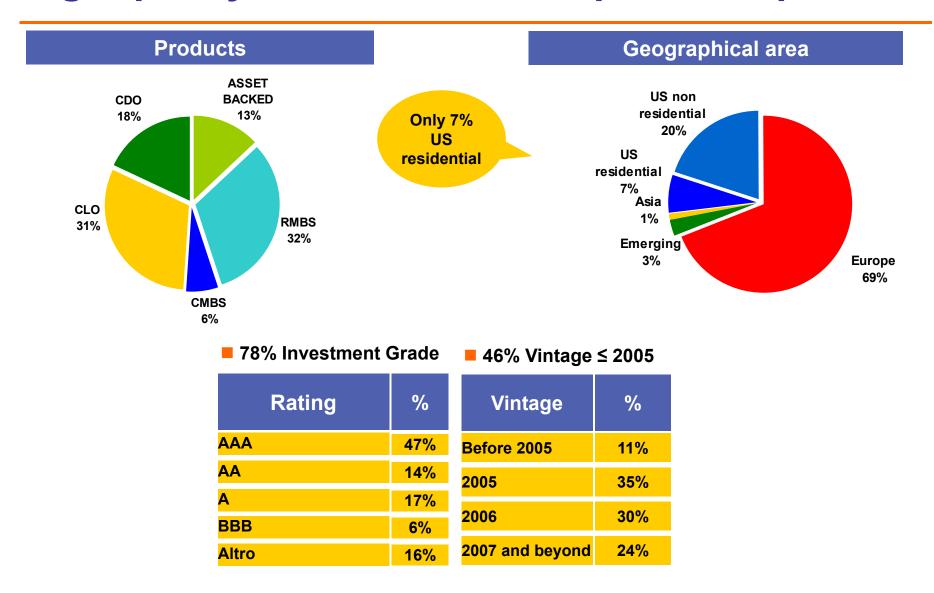

<sup>(1)</sup> The "Net exposure", which includes write-downs and write-backs, sets out: for securities, fair value; for derivatives, the nominal value of the contract, net of capital gains and losses recorded at the date of reference. Such amounts correspond, for "long" positions, to the maximum potential loss (in the event of 100% default and recovery rate of 0). For "short" positions, on the other hand, they indicate the maximum potential gain (in the same scenario in terms of default and recovery levelo). For assets reclassified to Loans, exposure to risk is provided by the carrying amount of the security, equal to fair value at the reclassification date, plus accrued interest calculated at the effective interest rate net of net value adjustments to the portion. As for "long" positions, 39% valued through mark-to-model (100% of funded positions, 29% of funded positions, 100% of monoline risk and of non-monoline packages), 49% through comparable approach (57% of funded positions, 59% valued through mark-to-model (100% unfunded positions and 100% of positions of funds) and 41% valued through effective market quotes (100% of CMBX-CDS hedges)

<sup>(2)</sup> Assets reclassified to the Loans portfolio showed, as at 30 June 2011, an overall impact on the income statement equal to €8m, broken down as follows: €3m losses, deriving from the impairment of a security included in the portfolio of the Romulus vehicle; +€11m profits on market disposal of reclassified debt securities, of which €7m ascribable to the Group company Banca IMI and €4m to the Parent Company

<sup>(3)</sup> Including Positions of funds for a net exposure of €63m as at 30.06.11 and of €64m as at 31.12.10
